

Positive Pathways

Essentials Checklist

Funding for activity-based projects for veterans that can have a positive impact on mental health.

Eligibility

You **MUST** be an Armed Forces charity or CIC working with Veterans, OR a non-Armed Forces charity or CIC with substantial recent experience of providing successful projects for Veterans. Those who aren't Armed Forces charities and don't have substantial recent experience of working with Veterans, can work with an Armed Forces charity or CIC as a delivery partner.

Grant amounts

You can **ONLY** apply for £35k for a one-year project. Based on our experience, this is the amount of funding we think are needed to ensure an excellent project can run successfully. Requests for other amounts are ineligible.

Fund Priorities

To support high quality work that benefits Veterans with mental health needs and enable the organisations delivering this work to build referral pathways both into and onwards from the support they offer. Projects must be activity based.

Veteran Focus

We are looking for projects which prioritise support for Veterans and may even involve Veterans in running the activities. Groups should be able to show that they know.

What to include

To have the best chance of funding, applications must include the what, when, who, where and why of the project and ensure they **CLEARLY** show how it will meet the priorities of the fund.

The application deadline is 12pm on 30th November 2020, no applications will be considered after this time.
